

Rapidshield Instantly Cured Flooring

why use it ?:

- *Does your plant operate 24/7 but can spare 30+ minutes for a highly rapid flooring installation.*
- *No odours – we can install flooring while plants operate.*
- *To define special areas*
- *To install safety flooring around operating machinery.*
- *To fix problem floors*
- *Clear sealer or coloured finishes.*

Can't stop your plant, but want improved flooring? use Rapidshield instant flooring.

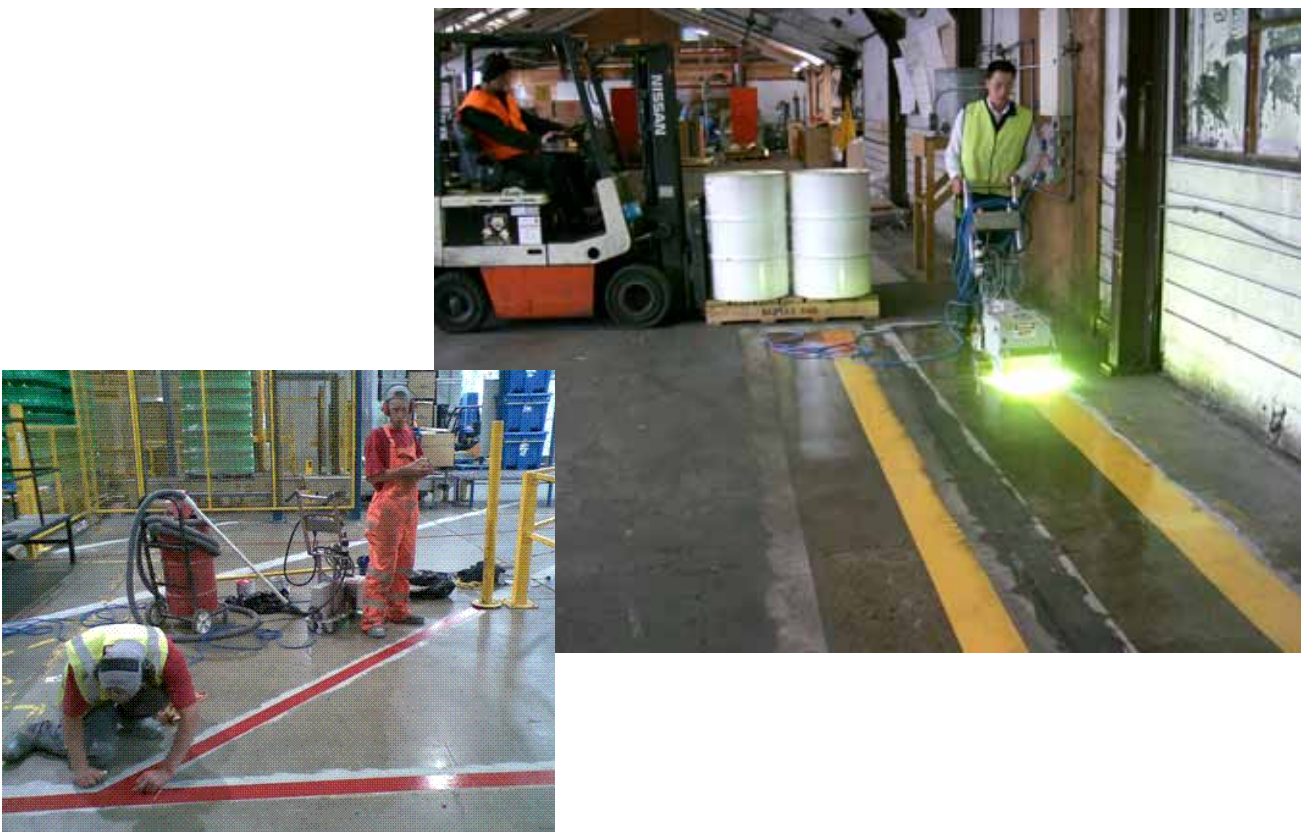

RapidShield™ is on site applied high-performance UV-curable floor coating system designed for concrete floors. The formulation is applied and then cured by a mobile UV-unit .

What are the **benefits of Rapidshield** over conventional floor paints?

- Cures instantly. If you operate 24/7 but can allow a short window.
- Improved wear and chemical durability
- No VOCs and very low odour
- Reduced floor maintenance costs; can be installed in and around operating equipment. Dust free preparation.
- Reduced application downtime
- Increased safety; safety colours and clear and non-slip
