

# Bituthene & Preprufe Drainage materials Hydroduct

Drainage materials are installed against the outside face of a waterproofing membrane (Bituthene or Preprufe) to carry water away to strip drains. These sheet materials ensure that water rapidly moves from the face of the waterproofing to the drains.

	Use
Hydroduct CF20	Cavity former only. (not pictured)
Hydroduct 220	General Drainage media with filter fabric.
Hydroduct 650	HD Drainage media with filter fabric for horizontal situations. For heavy duty, traffic applications.

Hydroduct 220
